

1.10 USER STORIES

By: Carly Cullen

1. Onboarding/Welcome “Flow”

As a **new user**, I want to be given a quick tutorial on the app’s basic functions and features, in order to generalize and simplify my interests and needs when I start using the app on a daily basis.

As a **new user**, I want to be able to have the option to sign up and receive push notifications and emails, in order to keep track of any new updates on the app or on my account.

As a **new user**, I want to be able to sign up to the app after I fully understand how to use the app’s functions and features, so I don’t get distracted or side tracked when going through the onboarding and demonstration process for a new user.

2. Pin Location

As a **user who sticks to the “usual” location**, I want to be able to pin my favorite beach locations to surf at so I don't have to constantly search the weather conditions that pertain to my favorite locations, every time I use the app.

As a **user who likes to share experiences with others**, I want to be able to pin my location on my map so other users can see what beach or location I'm surfing at. Once users see where I am on the map, they can meet up and surf with me.

3. Live Feed

As a **curious user**, I want to be able to interact with other users and professionals, in order to get an outsiders input on live weather updates and data.

4. Help-Service Chat

As a **user who is always asking questions**, I want to be able to reach out to a professional weather analyst and IT specialist when I have questions and concerns on features on the app, or questions on weather data in general.

5. Map Layers

As a **user who partakes in multiple water sports**, I want to be able to layer or un-layer different weather features that pertain to my specific water sports on top of my weather map. I want to do this in order to choose the water sport I would like to participate in that day, depending on the best weather conditions.

6. Search/Push Notifications

As a **returning user**, I want to be able to receive separate surfing and sailing reminders and weather updates, in order to make last minute decisions based on my specific water-sport plans.

7. Theme/View Map in Satellite or Map Mode

As a **visual learner and user**, I want to be able to choose the theme of my profile and view my weather map in either satellite mode or map mode. I want to be given these choices because I am color blind, therefore I can not see certain colors on apps.
